INDEX

AGEING, physiological, in Drosophila, 263.

Allantois, fluids of, and amnion; changes in volume and physical properties of, under normal and extreme temperatures, 141.

Amnion, fluids of, and allantois; changes in volume and physical properties of, under normal and extreme temperatures, 141.

Amylase, biliary, in the domestic fowl, 240.

Annelid, marine (Nereis vexillosa), studies on the life history of, 106.

Arbacia, acceleration of cleavage in eggs of, by hypotonic sea water, 244.

Arbacia punctulata, eggs and larvae of, exposed to phosphate and sodium ions, 213.

Asterias forbesi, eggs and larvae of, exposed to phosphate and sodium ions, 213.

BARNESS, LEWIS A. *See* Williams, Barness and Sawyer, 263.

BODENSTEIN, DIETRICH. Hormones and tissue competence in the development of Drosophila, 34.

BODENSTEIN, DIETRICH. Factors influencing growth and metamorphosis of the salivary gland in Drosophila, 13.

Blood, effect of carbon dioxide and lactic acid on the oxygen-combining power of whole and hemolyzed, of the marine fish, Tautoga onitis (Linn.), 207.

BLUMENTHAL, H. T. *See* Loeb, King and Blumenthal, 1.

BROOKS, MATILDA MOLDENHAUER. Methylene blue, potassium cyanide and carbon monoxide as indicators for studying the oxidation-reduction potentials of developing marine eggs, 164.

BROOKS, S. C. Intake and loss of ions by living cells. I. Eggs and larvae of Arbacia punctulata and Asterias forbesi exposed to phosphate and sodium ions, 213.

BROOKS, S. C. Intake and loss of ions by living cells. II. Early changes of phosphate content of Fundulus eggs, 226.

CARBON dioxide, effect of, on oxygen-combining power of whole and hemolyzed blood of Tautoga onitis (Linn.), 207.

Carbon monoxide, methylene blue and potassium cyanide, as indicators for studying oxidation-reduction potentials of developing marine eggs, 164.

Cattle, digestion of cellulose by protozoa in rumen of, 157.

Cellulase, in rumen protozoa, 157.

Cleavage, acceleration of, in Arbacia eggs, by hypotonic sea water, 244.

COE, WESLEY R. Development of the primary gonads and differentiation of sexuality in Teredo navalis and other pelecypod molluscs, 178.

Coloration, animal, methods of estimating the effects of melanophore changes on, 273.

CORNMAN, IVOR. Acceleration of cleavage of Arbacia eggs by hypotonic sea water, 244.

Corpus allatum, function of, in muscoid Diptera, 127.

Crustacea, reaction of, to direct and diffuse light, 98.

DAY, M. F. The function of the corpus allatum in muscoid Diptera, 127.

Differentiation, independent, of sensory areas of the avian inner ear, 252.

Digestion, of cellulose, by protozoa in cattle rumen, 157.

Diptera, muscoid, function of the corpus allatum in, 127.

DOUDOROFF, PETER. *See* Sumner and Doudoroff, 187.

Drosophila, factors influencing growth and metamorphosis of the salivary gland in, 13.

Drosophila, hormones and tissue competence in the development of, 34.

Drosophila, physiological ageing in, and utilization of glycogen during flight, 263.

ENVIRONMENT, visual, effects of, on the melanin content of fishes, 195.

Eustrongylides, influence of temperature, pH and inorganic ions upon the oxygen consumption of, 148.

EVANS, HIRAM J. The independent differentiation of the sensory areas of the avian inner ear, 252.

FARNER, DONALD S. Biliary amylase in the domestic fowl, 240.

Fish, melanin content in, affected by visual environment, 195.

Fish (Qryzias latipes), reproductive processes of the, 115.
Fishes, an improved method of assaying melanin in, 187.
Fundulus, early changes of phosphate content of eggs of, 226.

GERMINAL tissue, in Neotoca bilineata, 87.

Gonads, development of primary, in Teredo navalis and other pelecypod molluscs, 178.
GOODCHILD, CHAUNCEY G. The life-history of Phyllodistomum solidum Rankin, 1937, with observations on the morphology, development, and taxonomy of the Gorgoderinae (Trematoda), 59.
Gorgoderinae (Trematoda), observations on the morphology, development, and taxonomy of, 59.
Growth, of salivary gland; factors influencing, in Drosophila, 13.
Glycogen, utilization of, by flies during flight, 263.

HAYWARD, FREDERICK W. *See* Romanoff and Hayward, 141.
Hormones, and tissue competence in the development of Drosophila, 34.
HUNGATE, R. E. Further observations on cellulose digestion by the protozoa in the rumen of cattle, 157.
Hypotonic sea water, acceleration of cleavage of Arbacia eggs by, 244.

INORGANIC ions, influence of, upon the oxygen consumption of a larval Eustrongylides, 148.
Ions, inorganic, influence of, upon the oxygen consumption of a larval Eustrongylides, 148.
Ions, intake and loss of by living cells. *See* Brooks, 213, 226.
Ions, phosphate, eggs and larvae of Arbacia punctulata and Asterias forbesi exposed to, 213.
Ions, sodium, eggs and larvae of Arbacia punctulata and Asterias forbesi exposed to, 213.
IRVING, LAURENCE. *See* Root and Irving, 207.

JOHNSON, MARTIN W. Studies on the life history of the marine annelid, Nereis vexillosa, 106.

KING, H. D. *See* Loeb, King and Blumenthal, 1.

LACTIC acid, effect of, on oxygen-combining power of whole and hemolyzed blood of Tautoga onitis (Linn.), 207.
Light, direct and diffuse, reaction of certain crustacea to, 98.
LOEB, LEO, H. D. KING, AND H. T. BLUMENTHAL. Transplantation and individuality differentials in inbred strains of rats, 1.

MELANIN, assay of, in fishes, 187.

Melanin, effects of visual environment upon the content of, in fishes, 195.
Melanophore, changes, methods of estimating the effects of, on animal coloration, 273.
MENDOZA, GUILLERMO. The reproductive cycle of the viviparous teleost, Neotoca bilineata, a member of the family Goodeidae. IV. The germinal tissue, 87.
Metamorphosis, of salivary gland; factors influencing, in Drosophila, 13.
Methylene blue, potassium cyanide and carbon monoxide, as indicators for studying oxidation-reduction potentials of developing marine eggs, 164.

NEOTOCA bilineata, germinal tissue in the reproductive cycle of, 87.
Nereis vexillosa, studies on the life history of, 106.

ORYZIAS latipes, the reproductive processes of, 115.
Oxidation-reduction, potentials of, in developing marine eggs, 164.
Oxygen consumption, influence of temperature, pH and inorganic ions upon, in larval Eustrongylides, 148.

PARKER, G. H. Methods of estimating the effects of melanophore changes on animal coloration, 273.
Pelecypods, development of primary gonads and differentiation of sexuality in, especially Teredo navalis, 178.
pH, influence of, upon the oxygen consumption of a larval Eustrongylides, 148.
Phosphate content, early changes of, in Fundulus eggs, 226.
Phosphate ions, eggs and larvae of Arbacia punctulata and Asterias forbesi exposed to, 213.
Phyllodistomum solidum Rankin, 1937, life-history of, 59.
Potassium cyanide, methylene blue and carbon monoxide, as indicators for studying oxidation-reduction potentials of developing marine eggs, 164.

RATS, transplantation and individuality differentials in inbred strains of, 1.
ROBINSON, EDWIN J., AND ROBERTS RUGH. The reproductive processes of the fish, Oryzias latipes, 115.
ROMANOFF, ALEXIS L., AND FREDERICK HAYWARD. Changes in volume and physical properties of allantoic and amniotic fluids under normal and extreme temperatures, 141.
ROOT, R. W., AND LAURENCE IRVING. The effect of carbon dioxide and lactic acid on the oxygen-combining power of whole and hemolyzed blood of the marine fish, Tautoga onitis (Linn.), 207.
RUGH, ROBERTS. *See* Robinson and Rugh, 115.

SALIVARY gland, factors influencing growth and metamorphosis of, in Drosophila, 13.
SAWYER, WILBUR H. *See* Williams, Barness and Sawyer, 263.
SCHALLEK, WILLIAM. The reaction of certain crustacea to direct and to diffuse light, 98.
Sensory areas, independent differentiation of, in the avian inner ear, 252.
Sodium ions, eggs and larvae of Arbacia punctulata and Asterias forbesi exposed to, 213.
SUMNER, F. B. A further report upon the effects of visual environment on the melanin content of fishes, 195.
SUMNER, F. B., AND PETER DOUDOROFF. An improved method of assaying melanin in fishes, 187.

TAUTOGA onitis (Linn.), effect of carbon dioxide and lactic acid on whole and hemolyzed blood of, 207.
Temperature, influence of, upon the oxygen consumption of a larval Eustrongylides, 148.
Temperature, normal and extreme, effect of, on volume and physical properties of allantoic and amniotic fluids, 141.
Teredo navalis, development of primary gonads and differentiation of sexuality in, 178.
Tissue competence, and hormones, in the development of Drosophila, 34.
Transplantation, and individuality differentials in inbred strains of rats, 1.

VON BRAND, THEODOR. Physiological observations upon a larval Eustrongylides. IV. Influence of temperature, pH and inorganic ions upon the oxygen consumption, 148.

WILLIAMS, CARROLL M., LEWIS A. BARNESS AND WILBUR H. SAWYER. The utilization of glycogen by flies during flight, and some aspects of the physiological ageing of Drosophila, 263.
